

Welcome to become our partners in the field of education

Activities

Practical internships and exchange of experience

We will help you to organize internships for your teachers in our teaching and research environment. This will allow them to get valuable practical experience and expand their professional skills.

Exchange of students and teachers

We are ready to develop exchange programs for students and teachers between our educational institutions. This will allow you to get acquainted with new forms and methods of teaching. It will help to enrich the educational experience.

Educational tourism. Organization of international summer schools

We invite you to take part in the work of international summer schools to get acquainted with Belarusian national traditions, mental peculiarities and to develop intercultural skills.

The cost of all programs is calculated individually!

By teaching professional skills, we help our graduates to be ahead today and tomorrow...

Polotsk State Forest College

Branch of Educational establishment Belarusian State Technical University

Educational activities

www.pglk.belstu.by

Daydepartment

Specialty: Forestry

Qualification "Technician"

Education:

3.5 years after basic school

2.5 years after high school

During their studies, students gain knowledge on reforestation and afforestation, participate in activities to protect forests, and acquire the working profession "Forest feller 6th category" (boys), "Forester 4th category" (girls).

Our advantages:

- high training practical orientation
- own base for practical training (training and experimental forestation)
- 100% distribution to state forestry and forest management institutions, to national parks and reserves
- studying at universities according to a shortened program

TEACHING STAFF:

Teachers – 48,30% are graduates of our educational institution

42 years—the average age of the teaching staff

Genderstuff:

28% - men, 72% - women

Extramural Department

Specialty: Forestry

Qualification "Technician"

Training 3.4 years extramural based on general secondary education

The ideal way to achieve career success without being limited by your class schedule.

Our advantages:

- broadening your purview in your chosen profession
- flexibility in the schedule, allowing you to combine your study with work
- learning conditions are suitable for any location
- practice at your own working place

Advanced Training and Retraining Department

Specialty: Forestry

Qualification "Forest master"

Training 8 months based on vocational education

Retraining is learning and practicing to achieve a new career goal.

We are the only college which carries out retraining by Forestry specialisation

Our advantages:

- usage of innovative teaching methods
- work in a small group, which allows you to individualize your work with each student
- the opportunity to get an education, even if you are in another city or country
- reasonable pricing policy
